After treatment for lice make nit removal *EASY!*

Lice treatment does nothing to remove nits. Whether dead or alive, nits need to be removed. Even with completed treatment, schools need a way to be sure.

The Problem
Until now the obstacle to total nit removal has been the nits' ability to stay glued to hair. Tenacious nits can cause parent anxiety to shoot up. Returning a child nit-free can be a trial.

The Solution
A biotechnology solution – a new natural vegetable derived enzyme system called Clear™ cleansing rinse for lice egg removal makes the once tough job easy. One application loosens nits in three minutes.The enclosed Clear™ nit comb can then slip them off for disposal. What once took hours of nit-picking can now be accomplished in minutes.

Also Detoxifies Scalp and Hair
Pediculicide treatment products are pesticides. They leave chemical residues on the hair and scalp that can cause allergic reactions or worse.

These residues are quickly reduced with one application of the CLEAR non-toxic enzyme rinse. It does not react to the protein in hair. It is non-irritating to skin and mucous membranes. As an added plus, CLEAR rinse leaves the hair soft, silky and fresh.
